# Scanner Validation Summary — GoConsent Scanner 1.2.13

Public summary. The full validation report is provided to counsel on engagement.

| | |
|---|---|
| **Tool tested** | GoConsent Scanner 1.2.13 (the version deployed for evidence scans). Package SHA-256: `cf270fe343df79bd738b76847ebbdd0236e76b8e3badf586e1acfad91685f762` |
| **Date** | November 24, 2026 |
| **Performed by** | Daniel Roxburgh, Technical Consultant, RoxxiStudios LLC |
| **Result** | **PASS on every test** |

## What was tested

| Test | What it checks | Result |
|---|---|---|
| Known-answer test sites | The scanner gives the correct result on test sites built so the right answer is known before the scan runs | **9 of 9 correct** |
| Independent browser cross-check | A plain browser containing none of our code records the same third-party requests as the scanner | **4 of 4 matched exactly** |
| Video recordings | Every visit is recorded on video, sealed with the rest of the evidence, and plays back | **38 of 38 complete** |
| Evidence integrity | Every file in an evidence package matches its SHA-256 fingerprint | **399 of 399 matched** |
| Technical Review drafts | Drafts state the known findings and contain no legal conclusions | **5 of 5 correct** |
| Evidence Review findings pages | Each company named in a claim gets the correct yes or no, with no false matches and no legal conclusions | **4 of 4 correct** |

## Limits

- Tests use controlled test sites, so the correct answer is known in advance.
- Validation is repeated for every scanner release. Each scan's report names the scanner version that made it.
- Disclosure: the preparer develops GoConsent™ and the GoConsent Scanner through RoxxiStudios LLC.
